

Guitar Measurements Required For a Custom 19th Century Style “Coffin” Case

H1 = Total Guitar length

H2 = Body Length

H3 = Distance from bottom of guitar to width, W2 = _____

H3= _____

H4 = Distance from bottom of guitar to width, W1 = _____

H4 = _____

P = Width of Peg Head

F = Width of Neck Fret Board where it meets the guitar body

D = Thickness of guitar from its back to the surface of the strings

N = Thickness of the neck where it transitions to the curve of the block that attaches to the guitar body

For the best fit, a tracing on paper of the guitar body profile should be sent. Please note that thickness measurements are taken from the surface of the strings to the back of the neck (N) or to the back of the guitar (D).
